

Using your Slimline Touchpad

The 7" Touchscreen on your Alula Smart Security System is the central hub for keeping tabs on everything that happens with your system. View live and recorded video and interact with visitors at the front door. Control smart lights and all your other Z-Wave smart devices. With controls that are the same as your mobile app, you can rest assured that using your Touchpad will be simple and easy and fit right in with your busy schedule.

See reverse side for arming functions →
